ABOUT ME

Motivated and detail-oriented Software Engineering undergraduate with hands-on experience in full-stack web application development using React, Spring Boot, Node.js, and MongoDB. Skilled in developing responsive user interfaces, RESTful APIs, authentication systems, and database-driven applications. Strong ability to collaborate within teams, solve technical problems, and deliver scalable software solutions. Passionate about software engineering, backend development, and continuous learning.

WORK EXPERIENCE

Software Engineering Intern

Unitec Software Solutions - Gampha | July 2025 – January 2026

- Developed responsive web applications using React, HTML, CSS, and JavaScript.
 - Built and integrated RESTful APIs using Spring Boot, Node.js, and Laravel.
 - Worked with MongoDB, MySQL, and PostgreSQL databases for efficient data management.
 - Collaborated with development teams for feature implementation, debugging, testing, and maintenance.
 - Used GitHub for version control and project collaboration.
 - Participated in software testing, bug fixing, and performance optimization.
-

EDUCATION

BSc (Hons) in Software Engineering

- Kaatsu International University – 2022 - Present

Diploma in Cyber Security & Ethical Hacking

- SITC Campus – Feb 2025 - August 2025

Diploma in Psychology & Counselling

- SITC Campus – July 2025 - January 2026

Diploma in English

- ICBT Campus – Feb 2022 - July 2022

Certificate in Typesetting and Layout Design

- Sri Lanka Institute of Printing – Feb 2023 - July 2023

G.C.E. A/L – Engineering Technology Galahitiyawa Central College – 2020

G.C.E. O/L Parakrama National College – 2017

SKILLS

- Framework : React, Node.js, Laravel, Spring Boot, Bootstrap, Tailwind CSS, Blade
 - Programming Languages : C, C++, JAVA, PYTHON, JavaScript, HTML, CSS, PHP, C#
 - Database Technologies : MySQL, MongoDB, Firebase, PgSQL
 - Tools : Figma, Balsmiq, Jira board, Trello, visual studio, GitHub, Selenium, Android Studio
 - Soft Skills: Basic SEO knowledge, Teamwork, Leadership, Critical Thinking, Problem Solving
-

PROJECTS

MindTrack: BehaviourNet Mobile App (Ongoing Individual Research Project) GitHub

Technologies: React Native, Python, Flask, Machine Learning (Scikit-Learn), REST APIs

- Developing an individual research-based mobile application to passively sense user behavior (screen time, sleep, and mobility) and assess psychological well-being.
- Integrated pre-trained machine learning models with a Flask cloud backend (PythonAnywhere) to process behavioral features and generate real-time risk predictions.

Outing Aura Booking System (3rd Year Group Project - Team Lead) GitHub

Technologies: React Vite, Spring Boot, MongoDB, REST APIs

- Designed and developed a comprehensive system for booking and managing day trips and excursions, aimed at simplifying the process for users and administrators.
- Led and coordinated a team of four developers, managing task delegation, project timelines using Jira/Trello, and ensuring smooth integration between the React frontend and Spring Boot backend.

Auditorium Management System (3rd Year Group Project - Team Lead) GitHub

Technologies: React Vite, Spring Boot, MongoDB, REST APIs, Jira, Trello

- Developed a web-based reservation and event scheduling management system with real-time booking and availability tracking features.
- Acted as Team Lead, organizing daily stand-ups, mentoring team members on React and Express.js implementations, and actively contributing to core backend API development.

POS System for Retail Store (Internship Project)

Technologies: React, Laravel, PHP, MySQL

- Developed a Point-of-Sale system during professional internship for billing, inventory handling, and sales tracking.
- Implemented product management, transaction recording, and optimized database structures for sales and stock management.

Coffee Shop Management System (Full-Stack Web Project) GitHub

Technologies: Next.js, Node.js, Express.js, MongoDB

- Built a full-stack web application for handling products, customer orders, and sales records independently.
- Developed RESTful APIs for order processing and backend business logic while designing MongoDB schemas for efficient data storage and retrieval.
