ABOUT ME

Motivated and detail-oriented Software Engineering undergraduate with hands-on experience in full-stack web application development using React, Spring Boot, Node.js, and MongoDB. Skilled in developing responsive user interfaces, RESTful APIs, authentication systems, and database-driven applications. Strong ability to collaborate within teams, solve technical problems, and deliver scalable software solutions. Passionate about software engineering, backend development, and continuous learning.

WORK EXPERIENCE

Software Engineering Intern

Unitec Software Solutions | July 2025 – January 2026

- Developed responsive web applications using React, HTML, CSS, and JavaScript.
 - Built and integrated RESTful APIs using Spring Boot, Node.js, and Laravel.
 - Worked with MongoDB, MySQL, and PostgreSQL databases for efficient data management.
 - Collaborated with development teams for feature implementation, debugging, testing, and maintenance.
 - Used GitHub for version control and project collaboration.
 - Participated in software testing, bug fixing, and performance optimization.
-

EDUCATION

BSc (Hons) in Software Engineering

- Kaatsu International University – 2022 - Present

Diploma in Cyber Security & Ethical Hacking

- SITC Campus – Feb 2025 - August 2025

Diploma in Psychology & Counselling

- SITC Campus – July 2025 - January 2026

Diploma in English

- ICBT Campus – Feb 2022 - July 2022

Certificate in Typesetting and Layout Design

- Sri Lanka Institute of Printing – Feb 2023 - July 2023

G.C.E. A/L – Engineering Technology Galahitiyawa Central College – 2020

G.C.E. O/L Parakrama National College – 2017

SKILLS

- Framework : React, Node.js, Laravel, Spring Boot, Bootstrap, Tailwind CSS, Blade
 - Programming Languages : C, C++, JAVA, PYTHON, JavaScript, HTML, CSS, PHP, C#
 - Database Technologies : MySQL, MongoDB, Firebase, PgSQL
 - Tools : Figma, Balsmiq, Jira board, Trello, visual studio, GitHub, Selenium, Android Studio
-

PROJECTS

Garment Management System - Group project Team Leader

1st year

Technologies: PHP, HTML, CSS, MySQL

- Developed a web-based garment management solution for inventory and order management.
- Implemented backend functionalities for handling customer and supplier data.
- Designed user-friendly interfaces for administrators and users.
- Improved inventory tracking and operational management processes.
- Spearheaded a team to develop a web-based management solution, taking ownership of requirement gathering and database design

Auditorium Management System - Group Project Team Leader GitHub

2nd year

Technologies: React Vite, Node.js, Express.js, MongoDB

- Developed a web-based reservation and event scheduling management system.
- Implemented real-time booking and availability tracking features.
- Designed responsive frontend interfaces for smooth user experience.
- Built backend APIs using Node.js and Express.js.
- Integrated MongoDB database for reservation and event management.
- Acted as the Team Lead, organizing daily stand-ups and ensuring all project milestones were met on time.
- Mentored team members on React and Express.js implementations while actively contributing to the core backend API development.

Outing Aura booking system - Group Project Team Leader GitHub

3rd year

- Technologies Used :- React vite, CSS MongoDB, spring boot, visual studio, GitHub, Jira board, Trello
- Designed and developed a comprehensive system for booking and managing day trips and excursions, aimed at simplifying the entire process for users and administrators.
- Built with React for a dynamic and intuitive front-end, Spring Boot for a robust backend, and MongoDB for scalable data storage.
- Enables users to browse excursions, select dates, and receive instant booking confirmations with real-time availability tracking.
- Provides administrators with tools to efficiently manage trip details, schedules, and overall availability.
- Led and coordinated a team of four developers, managing task delegation and project timelines using Jira and Trello.
- Guided the team through the complete software development lifecycle, ensuring smooth integration between the React frontend and Spring Boot backend.

POS System for Retail Store

Technologies: React, Laravel, PHP, MySQL

- Developed a Point-of-Sale system for billing, inventory handling, and sales tracking.
- Implemented product management and transaction recording functionalities.
- Designed database structures for sales and stock management.
- Improved reporting accuracy and daily transaction management.

Coffee shop Management system

Technologies: Next.js, Node.js, Express.js, MongoDB

- Built a full-stack management system for handling products, customer orders, and sales records.
- Developed RESTful APIs for order processing and backend business logic.
- Implemented order status tracking and sales management functionalities.
- Designed MongoDB schemas for efficient data storage and retrieval.
- Managed frontend, backend, database integration, and testing independently.
